

AELP 101

Introduction to Electrical Engineering Laboratory

Course policy

Course contents

- Digital multimeter
- Digital storage oscilloscope
- Breadboard
- Function generator
- Network theorems
- RLC circuits
- AC phasors
- Opamp
- Diode circuits
- Transformer

Evaluation policy

Reports and day to day participation	40
Minor project	30
Viva/ Demo	30

- One student will be submitting one report (before the subsequent lab class) on behalf of the batch and that student will be getting marks. On rotation basis, other students will be submitting lab report. It is preferable to prepare the report in ‘LaTeX’.
- We will use Gradescope for lab report submission. No hard copy of the report is needed. (After all, we have a programme on sustainability!)
- A list of suggestive topics for the project will be floated.

Attendance policy

- No penalty for up to 2 sessions.
- Penalty of 5 marks per day missed beyond 3 sessions.
- In case of 6 or more sessions missed, you fail the course irrespective of the reason.
